1373mm Wide x 38mm Deep x 375mm High.
1173mm Wide x 38mm Deep x 375mm High.
973mm Wide x 38mm Deep x 375mm High.

Acoustic Screens (Class B) Flexible working environments are continuing to become essential in the workplace, with a requirement to accommodate a broad range of users. Removing walls as active barriers and opting for open plan offices and furniture layouts, utilises the building footprint and delivers modular furniture to support agile working techniques. With the higher number of employees using the same space, the noise within a closer proximity increases.

Research suggests that one of the biggest contributing factors of workplace unrest is inadequate acoustics and consideration must be given to employees working in congested environments to support their productivity. Investing in acoustic screen solutions will increase efficiency and employee morale, demonstrating a considerate approach to individual's wellbeing.
